

Ultrasound Trainers

Care Net recognizes the following individuals/companies as resources for equipping pregnancy center nurses and other appropriate medical professionals in the basics of performing limited obstetrical ultrasound. These individuals and organizations are staffed by licensed professionals who are well equipped to provide the training described. This is not intended to be an exhaustive list of the options open to pregnancy centers, as there may be appropriate trainers in your vicinity.

These training programs are conducted by separate individuals and organizations and are not employed by Care Net. As such, centers should be aware that Care Net cannot be responsible for the content of the training or advice offered. Centers should feel free to contact Care Net for clarification on issues and knowledge of Care Net distinctives. For example, it is Care Net's policy that Doppler ultrasound not be used under 9-10 weeks estimated gestational age.

Listed alphabetically:
